

We are counted amongst the emerging Manufacturer and Supplier firms leveraging innovation in the offered Portable Cabin and Structures. We are highly recognised for the sturdy construction, design standards, and superior finish of our products along with the timely services.

## Containerised Solutions:

### 1. Office Containers

*Our office cabins can also be made available with computer LAN, telephone and UPS connectivity pre-wired so that your office is online instantly.*

#### Office Cabin

VIEW A : FRONT VIEW (TOP LEFT SIDE)

### **Multi-purpose Office**

To avoid purchasing separate office cabins for distinct activities, a single long cabin is crafted into a multi-purpose workspace. You can select from a host of offerings that include manager's cabin, meeting room, conference room, waiting room, reception, store room, pantry and toilet-cum-shower. Service lines for all offerings are minutely configured. They are seamlessly integrated into the plan to provide good aesthetics, intrusion free work environment and convenience for routine maintenance.

### **Multi-storeyed Office**

*Stacked demountable double-storey office complex*

Portable offices can be linked vertically or horizontally (in varying combinations) to create a building or office complex. They can be stacked with utmost ease employing a standard crane. Service lines are (intelligently) planned to facilitate (serial) seamless connectivity between all linked offices. Strong detachable staircases are provided.

### **Executive Cabin**

iEngineering's Portable Executive Cabin is designed for senior managers who need independent working spaces similar to executive cabins at their headquarters. The executive section is private and provided with sufficient cabinet space, accessible points for phone, LAN and power. It has two windows for ample sunlight and ventilation.

The reception area is an intelligent design to offer several filing cabinets, a comfortable secretary's working area and visitors' seating. Facing the reception is an attached toilet-cum-bath with fittings from the top-of-the-line brands. Cabin can be air-conditioned upon request, and further customizations suiting personal tastes are possible.

### **Conference Room**

Standalone office designed for conducting conferences, trainings or presentations. Available in size 40' x 8', it is larger than the meeting room.

Seating arrangements up to a maximum of 50 people are available. All features required for holding conferences like overhead projector, video conferencing and PA system, etc. can be made as per customer requirements.

Since the number of participants would be usually higher, additional facilities like reception, pantry, integrated washroom / toilet can also be included to the plan.

### **Meeting Room**

Standalone office designed to be used as meeting room / conference room / situation room / war room with adequate and appropriate sized table. Seating arrangements for 6 to 20 people are available. Provision for overhead projector, video conferencing and PA system can be made as per specific customer requirements. Facilities like an attached pantry and toilet can be incorporated.

*These cabins are supplied with a full range of furniture, made from best quality MDF boards. This furniture is strong, durable and aesthetically pleasing, blending with overall décor of the cabins smoothly. The advantage you have is that you move into a fully furnished, wired and functional work space (made as per your individual needs) in an instant, as soon as the cabin is lowered and electrically connected.*

## **2. Accomodation**

*Our office cabins can also be made available with computer LAN, telephone and UPS connectivity pre-wired so that your office is online instantly.*

### **Site Accommodations**

These are made in various configurations to suit the background (labor, manager, executive) and number of persons (single, two, four, eight, etc.) dwelling in the unit. Strong, durable and aesthetically pleasing furniture specific to the needs of the end users is provided. Toilets and bathrooms are integrated so as to make the units self-sufficient.

**Available Sizes:** 20' x 8' / 40' x 8'

**Options:** Single occupancy, 2 men, 4 men, 8 men and dormitory-style

### **Bunkhouses**

These containerized units are typically "sleep only" cabins. The complete space is utilized for sleeping arrangements (sleep being the sole purpose) thus lodging more persons (up to max. 20) simultaneously.

**Available Sizes:** 20' x 8' / 40' x 8'

**Application:** Dormitory, Camps, Lodging for labor and lower grade working staff

### **Home-Office**

This is a combination of the best features of Containerized Office & Home designs for bringing the convenience of work, relaxation and accommodation within a single unit. Since customization is prime in these units, the design options can be as varied as your needs.

### **Container Homes**

This unit can accommodate up to 2 persons for living purposes. To bring the living standards of a permanent residence into a mobile home, state-of-the-art equipment is used for all aspects i.e. working, sleeping and sanitary needs. An ergonomic workstation, plush wardrobe and cabinets, a shower-cum-toilet comprising of hi-end accessories are some of the unique features. The interior design is compact yet luxurious. The frame, shell, flooring, walls and roofing are engineered to sustain harsh environments and frequent shifting, yet maintaining a fresh feel for years.

**Available Sizes:** 20' x 8' / 40' x 8'

**Applications:** On-site housing, Home-office, Luxury-cabins and holiday-homes for Resorts

## Container Colonies

Build compact portable colonies by stacking our container houses. Compact yet comfortable living quarters! They are designed for easy lift-n-shift capability.

These units can accommodate 2 to 4 persons. They incorporate two full size beds (2 persons) or two bunk beds (4 persons), lockable cabinets, and a shower-cum-toilet. There is ample space for unrestricted movement of the occupants. Customizations for luxurious single occupancy can also be made.

Ergonomic designs are applied to make sure that comfort is not compromised. The cabins are uniquely engineered to provide a portable solution for accommodating staff working away from home, operating in a remote area or simply requiring temporary accommodation.

## Features

- Fireproof, soundproof, and secure from ingress
- Durable to withstand frequent movement and rough use
- Compact and trouble-free plumbing, electrical points
- Rigid staircases

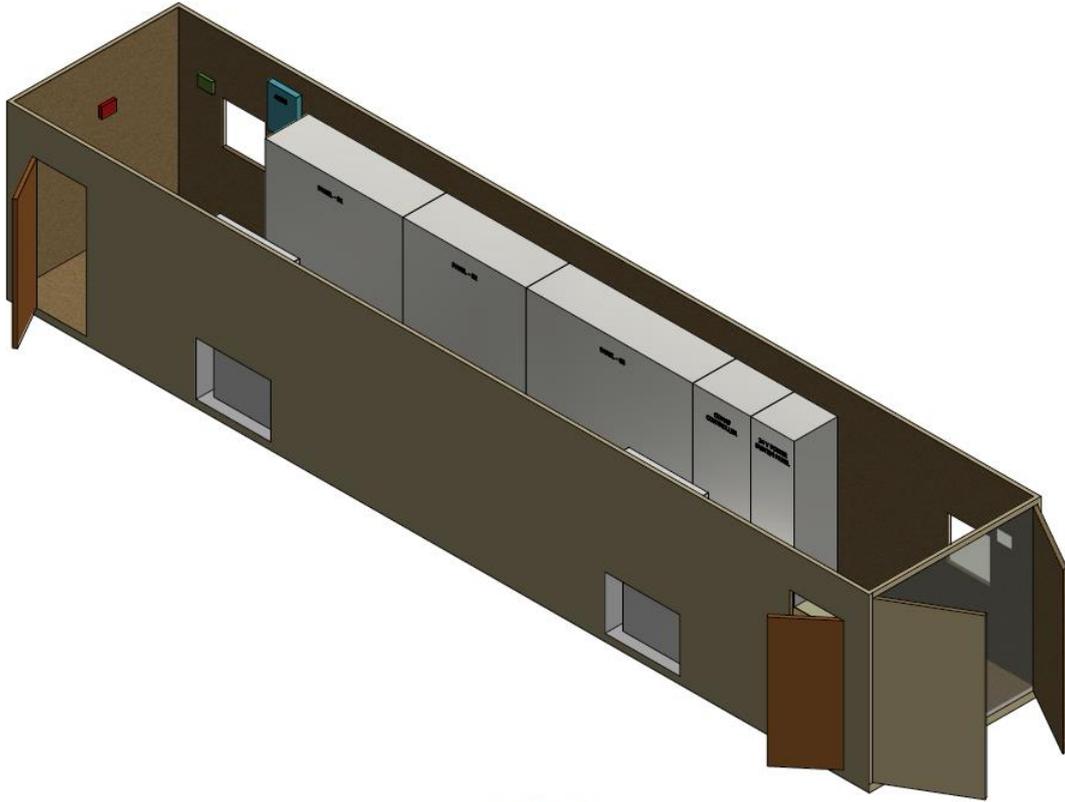

*These cabins are supplied with a full range of furniture, made from best quality MDF boards/ACP Sheets. This furniture is strong, durable and aesthetically pleasing, blending with overall décor of the cabins smoothly.
